

Sit Report
06-30-10

578 U.S. Fish and Wildlife personnel are actively engaged in response efforts to the Deepwater Horizon/BP Oil Spill.

Aerial operations observed heavy oil on Fourchon Beach in Louisiana. Oil is hitting the shore near the mouth of Southwest Pass and Pass Loutre, LA. Flights were shortened due to inclement weather.

15 skimming vessels are staged in Baptiste Collette, LA.

Trinity Island Wildlife, LA response personnel were evacuated due to inclement weather.

72 brown pelicans were transported and released at the Coast Guard Station in Brunswick, GA.

Adverse weather severely hampered cleanup efforts across the Mobile, AL sector. Offshore operations reported extremely heavy oil along northern edge of the spill.

Due to rising tides and high winds associated with tropical storm Alex, no shoreline surveys are expected in Texas.
